CONFIRMED COUNTS ONLY: confirmed cases and deaths as China defined them (asymptomatic infections were reported separately and are not included); they miss most of the December 2022 wave: China CDC's report of 15 January 2023 counts 59,938 COVID-19-related deaths in hospitals from 8 December 2022 to 12 January 2023. Corrected 2026-11-06 (GitHub issue #35): until then the value stopped at 23 December (294,881 cases, 605 deaths). Computed by the archive: 613 deaths / population 1,412,175,000 x 100 (the panel's population of CHN 2022).
