Archived response ilo_DF_UNE_2EAP_SEX_AGE_RT_dataflow_retrieved_2026-10-21.xml from https://sdmx.ilo.org/rest/dataflow/ILO/DF_UNE_2EAP_SEX_AGE_RT/1.0?detail=full, retrieved 2026-10-21.

Field	Value
Name (en)	Unemployment rate by sex and age -- ILO modelled estimates, Nov. 2025
LAST_UPDATE annotation (day/month/year)	02/12/2025 13:33:47
Description (en)	Imputed observations are not based on national data, are subject to high uncertainty and should not be used for country comparisons or rankings. This series is based on the 13th ICLS definitions. The unemployment rate conveys the number of persons who are unemployed as a percent of the labour force (i.e., the employed plus the unemployed). The unemployed comprise all persons of working age who were: a) without work during the reference period, i.e. were not in paid employment or self-employment; b) currently available for work, i.e. were available for paid employment or self-employment during the reference period; and c) seeking work, i.e. had taken specific steps in a specified recent period to seek paid employment or self-employment. For more information, refer to the ILO Modelled Estimates (ILOEST) database description.
