Definition note 定義說明 (2001). Census count; persons enumerated in India who were born in another country: the sum of the five foreign-continent rows of Table D-01 (Asia beyond India 6,051,965, Europe 23,938, Africa 64,628, America 19,794, Oceania 6,605). A further 421 persons are "unclassifiable" by place of birth and are not counted. Unlike the 2011 value, which is published rounded to the nearest thousand (5,490,000), this figure is exact.

Definition note 定義說明 (2005). UN estimate (not annual); mid-year benchmark year only; retrieved from World Bank mirror of UN DESA International Migrant Stock, retrieved 2026-10-07. UN DESA declares this country's stock as based on citizenship (data type C), not place of birth; see the known issue on UN DESA data types.

Definition note 定義說明 (2010, 2015, 2020). UN estimate (not annual); mid-year benchmark year only; retrieved from World Bank mirror of UN DESA International Migrant Stock, accessed 2026-08

Definition note 定義說明 (2011). Census count; persons enumerated in India who were born in another country: the official national row "Born Outside India" of Table D-01 (males 2,550,633, females 2,812,466). The five foreign-continent rows add up to it; 290,812 persons of unclassifiable place of birth are not counted, as for 2001. Replaces 5,490,000, a figure from Table 2a of Singh and Biradar (Demography India 51(1), 2022), which is built on Table D-2 (place of last residence) and is not a birthplace count. Corrected on 2026-10-07.

How this was confirmed 確認方式 (2001). Confirmed in the archived source file (Table D-01, rows for the foreign continents); the rows add up to total population minus born in India.

How this was confirmed 確認方式 (2005). Read directly from the archived API response (evidence/api/wb_SM_POP_TOTL_2001-2022_retrieved_2026-10-07.json); retrieved 2026-10-07.

How this was confirmed 確認方式 (2011). Read directly from the official D-01 workbook (archived; byte-identical to a fresh download of 2026-10-07).

Correction applied 已套用更正. The first release used 5,490,000 (2,513 + 2,977 thousand), which is Table 2a of a journal article built on Census Table D-2 (place of LAST residence); the official birthplace table D-01 gives a different number.
