> **Definition note 定義說明 (2001-2017).** ILO imputed value: the ILO gives it no observation status (its real values are marked R, "Real value") and publishes a lower and an upper bound with it (in the raw response and in data/unemployment_source_comparison.csv). The ILO describes imputed observations as not based on national data, subject to high uncertainty and not to be used for country comparisons or rankings (dataflow description, evidence/api/ilo_DF_UNE_2EAP_SEX_AGE_RT_dataflow_retrieved_2026-10-21.xml).

> **Definition note 定義說明 (2018-2022).** ILO observation status R (Real value): the estimate rests on national data.
