

OECD International Migration Database — dataflow definition

Authoritative structural metadata retrieved from the OECD SDMX registry on 2026-08-17. This is the service the archive's OECD values were queried from.

Why this page exists. `oecd.org` returns HTTP 403 to every automated client, so the OECD's human-facing dataset page could not be mirrored. The SDMX registry — the actual data source used — is open, and its dataflow definition is reproduced here and archived in full as `evidence/api/oecd/DSD_MIG_dataflow_metadata.xml` .
