**Definition note.** Modelled resident stock (ACS residual method), reference date 1 January 2010. AMBIGUITY FLAG: Table A2-1 prints TWO values for 2010 (10,790,000 and 11,590,000) reflecting a revision to align with the 2010 Census. 11,590,000 is recorded here because it is continuous with the 2011-2018 series; 10,790,000 is retained as an alternative row. Verify against the PDF before publication. Value read independently by two extractions.
