Definition note 定義說明. Census count; persons enumerated in India who were born in another country: the sum of the five foreign-continent rows of Table D-01 (Asia beyond India 6,051,965, Europe 23,938, Africa 64,628, America 19,794, Oceania 6,605). A further 421 persons are "unclassifiable" by place of birth and are not counted. Unlike the 2011 value, which is published rounded to the nearest thousand (5,490,000), this figure is exact.

How this was confirmed 確認方式. Confirmed in the archived source file (Table D-01, rows for the foreign continents); the rows add up to total population minus born in India.

Correction applied 已套用更正. The first release used 5,490,000 (2,513 + 2,977 thousand), which is Table 2a of a journal article built on Census Table D-2 (place of LAST residence); the official birthplace table D-01 gives a different number.
