Definition note 定義說明. Reference date 31 March 2022. Administrative count of infiltrators (מסתננים) resident in Israel, i.e. persons who entered irregularly via the Egyptian border; 76% Eritrean, 14% Sudanese. A LOWER BOUND on the unauthorised foreign population: it excludes the 22,571 illegal foreign workers the same source reports at the same date, and the roughly 30,100 tourists without a valid permit at end-2020. By the definitions the source gives, these three groups do not overlap. Not comparable with the modelled estimates used for European countries.

How this was confirmed 確認方式. The published figure appears in the archived source document.

Correction applied 已套用更正. Moved, not discarded: an overstay count, not an estimate of the unauthorised population, and the 2022 cell of this column counts a different, mutually exclusive group. See irregular_proxy_overstayers for the same year.
